

## 2400L POWER AMPLIFIER

400 Watts  
RF Power  
For:

- Ultrasonic
  - Testing
  - Laboratory use
- 
- 10 KHz to 10 MHz
  - Instantaneous Bandwidth
  - 400 W 1dB Compression
  - Solid State
  - Air Cooled

The 2400L Amplifier is a rugged source of RF power, useful for ultrasonics, HF transmitters, RFI/EMI, plasma equipment and general laboratory applications. The 2400L represents E&I's commitment to providing RF power amplifiers of the highest quality, durability and ruggedness.

### **FLEXIBILITY:**

The 2400L produces 400 Watts of class A linear power output over the entire frequency range from 10 KHz to 10 MHz. It has very low harmonic distortion along with low IMD products. Operation over the band is achieved without the need for any band switching or indeed any adjustments. The power gain is rated at 55 dB with a typical gain flatness of +/- 1.5 dB

The 2400L is compatible with most signal generators, frequency synthesizers, sweep generators and other laboratory signal sources. It accurately reproduces all waveforms within its power and frequency ranges: AM, FM, SSB, pulsed and other complex modulation schemes.

### **RUGGEDNESS:**

The 2400L is built to withstand a 13 dBm input (1.0 Volt RMS) for any VSWR load condition. The internal switched mode power supply is very conservatively rated, in order to facilitate operation over a large range of line conditions and temperatures. The forced air cooling provides for low internal temperatures, providing long term reliability. The RF power is delivered by rugged DMoS FETs, de-rated to provide for excellent MTBF.
